

**DEAR PARENTS AND GUARDIANS:**

Divine Mercy Catholic School is starting a robotics team this coming fall and would like YOUR student to join the team! Students on the team will engage in programming, engineering, and competitive tournaments built around the VEX IQ robotics platform. The team is open to students in 4<sup>th</sup>-8<sup>th</sup> grade, ages nine to fourteen. The team will meet after school in the DMCS Media Lab two times each week from 3PM to 5PM. Current planning calls for two competitions during the school year with the possibility of further competitive events depending on performance of the team. **There is currently no plan to limit the number of students on the team. The school plans to run multiple teams if there is enough interest!**

Mr. Robinson (DMCS Media Instructor) will be the primary coach of the team. Please direct questions about the team to him. If you have a student interested in joining the team, or are interested in volunteering to help, **please fill out and return the bottom part of this letter to DMCS!**

My student, \_\_\_\_\_ is interested in joining the team! Please send us more information!

I am Interested in volunteering to help the team out during either meetings or at events
